

BOTH HOT WATER
AND HOME HEAT
FROM A SINGLE,
EFFICIENT SOURCE

COMBO HOME HEAT

RXAH46

Combo home heat consists of a Redzone™ Air Handler that is connected to virtually any hot water heater but is optimized to work with a tankless water heater. When paired with a tankless water heater, this not only provides efficient home heat but virtually endless domestic hot water as well.

Installation is simple and compact:

Small, lightweight components offer a wide variety of mounting and ducting configurations. Wall-mounting is a real space-saver.

Perfect for retrofit applications:

This high-quality unit combines high efficiency with excellent value. Now many former hot water tank users can enjoy the endless supply and space-saving features of a tankless home heat installation. In retrofit situations, the existing ductwork can simply be used.

**RED
ZONE™**
DESIGNED TO PERFORM

AN EFFICIENT, SPACE-SAVING ALTERNATIVE

- 1 Premium Grundfos circulator pump
 - 2 Advanced 3 row copper tube heating coil with aluminum fins
 - 3 Premium 1" insulation
 - 4 Electronic control board
 - 5 Premium ECM motor
- Return air knockout on both sides and bottom
- Zero clearance installation on back and sides

Flexible installation options:

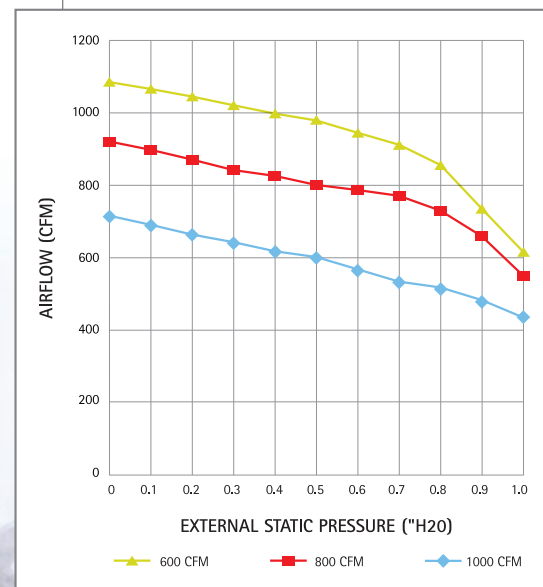

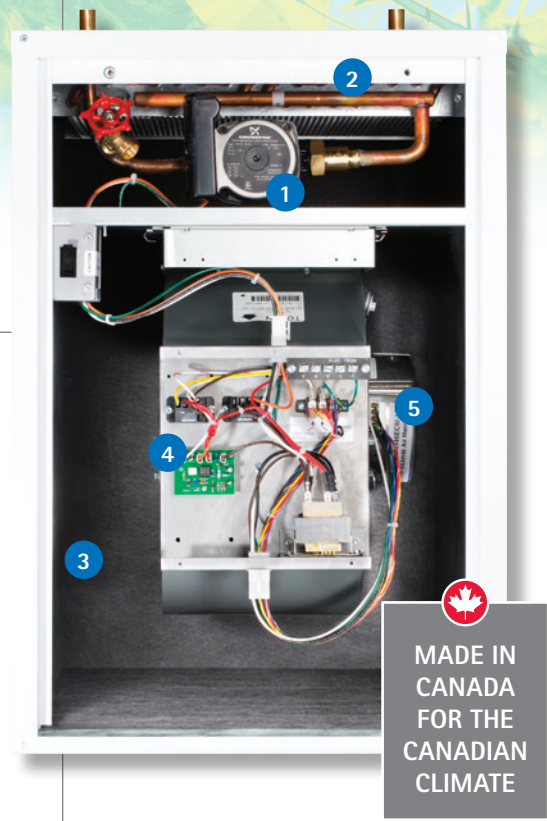

The RedZone™ Air Handler requires no venting or gas lines so you can place it in a closet, crawl space or basement. The Tankless Water Heater can be mounted on either an exterior or interior wall.

Efficiency and Comfort:

Most Tankless Hot Water Heaters offer thermal efficiencies approaching 100%! And the RedZone™ Air Handler employs a super-efficient ECM motor. Plus, the heat generated is less dry – more comfortable than a typical gas furnace.

Air Conditioning:

The RedZone™ Air Handler is designed to accept most brands of evaporator coils. Plus the ECM motor delivers a gentle, efficient flow – so staying cool costs less!

Dimensions - 20" W x 29.5" H x 24" D
 Weight - 98 lb (44.5 kg)
 BTU - 46,000
